Q.2 function CHECK EQUIVALENCE (KB, 1KB2) return true or false Symbol Iist of proposition symbols in KB, &KB2 return TI CHECK ALL (KB, 1KB2, Symbol, [])
function TT_CHECK_ALL(KB, KB2, symbol, model) returns true or false
if EMPTY? (SYMBOL) then
if PL-TRUE ? (KB, model) then
if PL_TRUE (KB2, model)
return true.
else
return false
else
if PLITRUE (KB2, model)
return false;
Ose
return true,
else do
p < First (Symbol);
rest < Rest (symbol);
return TT_CHEEK ALL (KB, KB2, rest, model U\{P=true
and TT_CHECK_ALL(KB,, RB, rest, model U & p = false
